

VigorPhone 350

IP Phone

DrayTek

www.draytek.com

- Workable with Vigor/IPPBX series for auto provision capability
- Support G.722 codec for your crystal-clear voice quality
- Multi-SIP registration with different Proxy (up to 10 accounts) for managing your various calling purposes
- PoE and general power supply connection convertible for fitting your power supply structure
- GUI & LCD Menu configuration for easing your adoption
- BLF (Busy-Lamp Field) for easing your call management processes via its user-friendly switchboard-like features
- TR-069 compatible via firmware upgrade for your centralized management needs

With high quality of voice, VigorPhone 350 is designed for Vigor/IPPBX and SIP server to fit the requirement and environment of small & medium business enterprise.

It is a telephone which can transport voice by integrating data package of IP (Internet Protocol) protocol. In addition, it can be used in network from LAN to WAN. Transmitting through network with low cost, the sound quality is good as ordinary telephone line. Such advantage will save your money greatly.

It is workable with Vigor/IPPBX series for auto provision capability. To manage various calling purposes, VigorPhone supports multi-sip registration with different accounts (up to 10) and support G.722 codec for promoting voice quality. The simple WEB UI based configuration allows you to configure VigorIPPBX with ease.

The functions of VigorPhone 350 are much like the ordinary telephone in inner and out lines. With the stability, sound quality, compatibility and the rich functionalities, VigorPhone 350 can make your life conveniently.
